#### 1. Qualitative Information on Quarterly Financial Results for the Period under Review

## (1) Explanation of Operating Results

During the first quarter of FY 2022, while the global economy showed signs of recovery from the effects of the COVID-19 pandemic, the situation remained uncertain due to concerns about the emergence of new virus variants leading to new outbreaks in some regions, the prolonged crisis in Ukraine, soaring crude oil prices, and rising raw material prices. Under these circumstances, the dollar-yen exchange rate moved within the range of \infty 122 to \infty 136 per US\infty 1.

In the air transportation industry, in addition to recovery in domestic flight demand, a gradual recovery is seen in demand for international flights mainly in Europe and North America as countries ease or do away with entry restrictions, and some airlines have begun to return out-of-service aircraft to service and order new aircraft in anticipation of the post-COVID-19 era. Aircraft manufacturers, as well, are starting to see increased orders for some models, chiefly smaller aircraft, with the recovery of air passenger demand.

As air passenger demand shows signs of gradual recovery in these ways, the Group has sought to achieve readiness for the rebound in demand by transferring back employees seconded to companies outside the Group and beginning to recruit new graduates for the current fiscal year. In the production process, we continued activities to improve operational efficiency in preparation for further demand rebound, initiated plans to expand the capacity and functions of a factory in the Philippines, and to strengthen our supply chain both in Japan and overseas. In addition, we actively worked on sustainability initiatives.

In the aircraft interiors business, the recovery in airline passenger demand has led to an increase in demand for maintenance parts and cabin modification in order to utilize aircraft owned by airlines, and we strengthened efforts toward a stronger production organization to meet the demand. To ease the anxiety of passengers onboard, we carried out product development for ensuring a clean and hygienic cabin and conducted research and proposals with a view to expanding into galleys, lavatories, and seats.

In the aircraft seat business, we devoted efforts to readying versions of the highly profitable Venture business class seat for additional aircraft types, as well as to the development of the next generation Quest for Elegance business class seat.

In the aircraft components business, we took initiatives to improve productivity, and continued with development of lightweight aircraft components using thermoplastic CFRP and expansion in application of CFRP components into fields other than the aircraft sector.

In the aircraft maintenance business, we aimed to strengthen a business base capable of generating stable profits by continuing with initiatives to ensure flight safety and enhance quality, while also endeavoring to acquire orders for aircraft maintenance for airlines and for government and municipal offices.

As a result, on a consolidated basis, during the first quarter of FY 2022, the Company posted net sales of \(\frac{\pmathbf{7}}{111}\) million (down \(\frac{\pmathbf{3}}{3}\),430 million compared to the same period of the previous fiscal year), operating income of \(\frac{\pmathbf{1}}{120}\) million (an operating loss of \(\frac{\pmathbf{1}}{13}\) million in the same period of the previous fiscal year), ordinary income of \(\frac{\pmathbf{2}}{211}\) million (an ordinary loss of \(\frac{\pmathbf{2}}{223}\) million in the same period of the previous fiscal year), and net income attributable to shareholders of parent company of \(\frac{\pmathbf{3}}{375}\) million (a net loss attributable to shareholders of parent company of \(\frac{\pmathbf{1}}{310}\) million in the same period of the previous fiscal year).

Provision for loss on construction contracts of \(\frac{\pmatrix}{3}\),698 million for construction to be completed in or after the quarterly second quarter of FY 2022 was recognized as of June 30, 2022. The impact of this provision for loss on construction contracts on income (loss) for the cumulative first quarter of FY 2022 was a decrease of \(\frac{\pmatrix}{130}\) million in cost of sales (provision for loss on construction contracts as of March 31, 2022 was \(\frac{\pmatrix}{3}\),828 million).

For the entire Group, selling, general and administrative expenses, non-operating income (expenses), and extraordinary income (loss) are as follows:

Selling, general and administrative expenses were ¥1,895 million (an increase of ¥129 million compared to the same period of the previous fiscal year), due mainly to increases in personnel expenses, sales commissions, and warranty expenses.

The result for non-operating income (expenses) was a gain of ¥91 million (a loss of ¥110 million in the same period of the previous fiscal year), due to factors such as an increase in foreign exchange gains as the yen value dropped on the foreign exchange market from the end of the previous fiscal year and a decrease in compensation expenses, despite an increase in interest expenses mainly reflecting higher U.S. interest rates.

The result for extraordinary income (loss) was a gain of ¥64 million (a gain of ¥12 million in the same period of the previous fiscal year). The main extraordinary loss was a COVID-19-related loss of ¥45 million consisting of running costs including fixed costs resulting from the temporary leave of employees, and extraordinary income consisted mainly of subsidy income of ¥111 million including subsidies for employment adjustment.

Business performance by segment is as follows.

#### [Aircraft Interiors Business]

In the aircraft interiors business, net sales decreased from the same period of the previous fiscal year due to the absence of additional sales resulting from specification change requests from customers that were recorded in the same period of the previous fiscal year, and a drop in shipments of galleys and lavatories along with cutbacks in production of the Boeing 787 aircraft. On the other hand, despite the decrease in net sales, ordinary income increased thanks to improvement in operational efficiency, foreign exchange gains resulting from the depreciation of the yen, and increased sales of spare parts to airlines as the number of aircraft in operation grew.

As a result, the aircraft interiors business posted net sales of \(\xi\)4,535 million (down \(\xi\)3,248 million compared to the same period of the previous fiscal year) and ordinary income of \(\xi\)1,098 million (up \(\xi\)619 million compared to the same period of the previous fiscal year).

### [Aircraft Seat Business]

In the aircraft seat business, net sales decreased from the same period of the previous fiscal year, as shipments of the Venture business class seat were postponed to the following quarter or later, along with cutbacks in production of the Boeing 787 aircraft. Meanwhile, an ordinary loss was posted due mainly to the decrease in net sales.

As a result, the aircraft seat business posted net sales of ¥141 million (down ¥423 million compared to the same period of the previous fiscal year) and an ordinary loss of ¥719 million (ordinary loss of ¥721 million in the same period of the previous fiscal year).

#### [Aircraft Components Business]

In the aircraft components business, net sales increased from the same period of the previous fiscal year due to an increase in shipments of CFRP structure parts and aircraft engine parts for commercial aircraft products. Meanwhile, despite the increase in net sales, an ordinary loss was posted due to factors such as higher selling, general and administrative expenses.

As a result, the aircraft components business posted net sales of ¥954 million (up ¥195 million compared to the same period of the previous fiscal year) and an ordinary loss of ¥90 million (ordinary loss of ¥106 million in the same period of the previous fiscal year).

#### [Aircraft Maintenance Business]

In the aircraft maintenance business, net sales increased from the same period of the previous fiscal year with the increase in orders for parts maintenance. Meanwhile, despite the increase in net sales, an ordinary loss was posted due to factors such as higher selling, general and administrative expenses.

As a result, the aircraft maintenance business posted net sales of \(\xi\)1,479 million (up \(\xi\)45 million compared to the same period of the previous fiscal year) and an ordinary loss of \(\xi\)77 million (ordinary income of \(\xi\)135 million in the same period of the previous fiscal year).

#### [Others]

The Others segment includes the businesses of consolidated subsidiary Orange JAMCO Corporation. The focus is on inter-segment transactions, including assistance work in the aircraft interiors business.

As a result, the Others segment posted net sales of ¥0 million (¥0 million in the same period of the previous fiscal year) and ordinary income of ¥0 million (ordinary loss of ¥10 million in the same period of the previous fiscal year).

#### (2) Explanation of Financial Position

(Assets, Liabilities, and Equity)

Total assets as of June 30, 2022 amounted to ¥96,555 million, up ¥2,904 million from the end of the previous fiscal year. Of this amount, total current assets increased by ¥2,362 million from the end of the previous fiscal year, as despite the decline in notes and accounts receivable - trade, and contract assets by ¥4,643 million, work in process increased by ¥3,671 million, and raw materials and supplies increased by ¥1,871 million from the end of the previous fiscal year. Total non-current assets also increased by ¥541 million from the end of the previous fiscal year, as property, plant and equipment increased by ¥205 million and intangible assets increased by ¥57 million from the end of the previous fiscal year. Total liabilities amounted to ¥84,873 million, up ¥2,317 million from the end of the previous fiscal year. The main factor was a rise in short-term loans payable by ¥1,316 million from the end of the previous fiscal year.

Total net assets amounted to \\(\frac{\pmathrm{\text{411,681}}}{11,681}\) million, up \(\frac{\pmathrm{\text{4586}}}{560}\) million from the end of the previous fiscal year. The main factor was an increase in retained earnings resulting from net income attributable to shareholders of parent company. As a result, the equity ratio stood at 11.7%.

#### (3) Explanation of Consolidated Financial Results Forecast and Other Forward-looking Information

Profits for the cumulative first quarter of FY 2022 exceeded the consolidated financial results forecast announced on May 11, 2022. This was due to the increase in sales of spare parts in the aircraft interiors business as the number of aircraft in operation grew and the weaker-than-expected yen in the foreign exchange market.

The consolidated financial results forecast for FY 2022 remains unchanged as the Group assumes that it will continue to see the spread of COVID-19 (and its virus variants) and the uncertain business environment for the time being.

The exchange rate assumed for the consolidated financial results forecast remains unchanged at ¥115 per US\$1 at this time.

#### 3. Others

Significant Events Regarding Going Concern Assumption

The Group has suffered a significant impact from the COVID-19 pandemic, as aircraft manufacturers have had to make production cutbacks or reschedule production, resulting in a major drop in shipments of interior products, seats and other products, in addition to a decline in cabin modification products for airlines with the decrease in flights. In FY 2020, we posted an operating loss, net loss attributable to shareholders of parent company, and minus cash flows from operating activities; while in FY 2021, we continued to post an operating loss and net loss attributable to shareholders of parent company, so that we recognize the existence of events or circumstances raising material uncertainties regarding going concern assumption.

The Group has responded to this situation by revising production plans, reorganizing production bases, reducing fixed costs including by temporary leave of employees and secondment to companies outside the Group, limiting investment, and striving to enhance the efficiency of management by reducing inventories.

Moreover, with the increase in operating aircraft in and after FY 2021, inquiries and orders from airlines have increased for spare parts, cabin modification products, and seats, in signs that demand has bottomed out. As for coming travel demand, based on demand forecasts by the International Air Transport Association, the Group has determined that such demand will gradually recover, resulting in increased orders and shipments of our products on the way to a performance recovery.

In addition to the above, the Group, through recovery of accounts receivable - trade and other factors, was able to achieve a plus cash flow from operating activities in the previous fiscal year, and therefore determines that there are no material uncertainties regarding going concern assumption.
